

Somos® PerFORM

Stereolithography

A fast processing stereolithography material resulting in strong, stiff and accurate parts with high feature resolution.

Somos® PerFORM is the material of choice for applications that require strong, stiff, high temperature resistant composite parts. With its excellent high heat tolerance, outstanding detail resolution and stiffness, **Somos® PerFORM** is the ideal material for a variety of applications including tooling, wind tunnel testing, high temperature testing, electrical casings and automotive housings.

With the lowest viscosity of any composite stereolithography material, parts made from **Somos® PerFORM** are faster to build, easier to post-process clean, possess superior sidewall quality and provide unmatched detail resolution.

Key Benefits

- Excellent detail resolution
- Fast, easy processing & finishing
- Superior high heat tolerance

Ideal Applications

- Tooling
- Wind tunnel testing
- High temperature testing
- Electrical casings
- Automotive housings

Technical Data

Liquid Properties		Optical Properties		
Appearance	Off-White	E _c	7.8 mJ/cm ²	[critical exposure]
Viscosity	~1,000 cps @ 30°C	D _p	4.3 mils	[slope of cue-depth vs ln (E) curve]
Density	~1.61 g/cm ³ @ 25°C	E ₁₀	80 mJ/cm ²	[exposure that gives 0.254 mm (.010 inch) thickness]

The manner in which you use our products, technical assistance and information (whether verbal, written or by way of production evaluations), including any suggested formulations and recommendations, is beyond our control. Therefore, it is imperative that you test our products to determine suitability for your processing and intended uses. Your analysis must at least include testing to determine suitability from a technical, health, safety, and environmental and regulatory standpoint. Such testing has not necessarily been done by Covestro, and Covestro has not obtained any approvals or licenses for a particular use or application of the product, unless explicitly stated otherwise. If the intended use of the product is for the manufacture of a pharmaceutical/medicinal product, medical device¹ or of pre-cursor products for medical devices or for other specifically regulated applications which lead or may lead to a regulatory obligation of Covestro, Covestro must explicitly agree to such application before the sale. Any samples provided by Covestro are for testing purposes only and not for commercial use. Unless we otherwise agree in writing, all products are sold strictly pursuant to the terms of our standard conditions of sale which are available upon request. Any statement or recommendation not contained herein is unauthorized and shall not bind us. Nothing herein shall be construed as a recommendation to use any product in conflict with any claim of any patent relative to any material or its use. No license is implied or in fact granted under the claims of any patent. For more information on Covestro products in Medical Applications, please request from your sales support contact our Guidance document: GUIDANCE ON USE OF COVESTRO PRODUCTS IN A MEDICAL APPLICATION. These values are typical values only. Unless explicitly agreed in written form, they do not constitute a binding material specification or warranted values. The biocompatibility testing referenced above cannot assure the biocompatibility of final or intermediate products made from Covestro products or the suitability of such products for their use in a medical application, i.e., the test data cannot be used to conclude that any medical devices manufactured from the Covestro products meet the necessary requirements of ISO Standard 10993-1. It is the sole responsibility of the manufacturer of the final end-use product to conduct all necessary tests (including biocompatibility tests) and inspections and to evaluate the final product under actual end-use requirements.
